Our 10-step model helps participants identify their purpose, values and vision in order to define the focus and character which defines their leadership. A 90-day action plan for each participant will be developed focusing on the few things which have the largest impact, for both personal and professional development.

Oxford LeadershipTM
Self Managing Leadership Model

The SML Model is a ‘strategic’ planning tool and framework for leadership development. It provides the right insights to identify strengths and weaknesses related to a leader, but more importantly, it explores the values and purpose that define a leader’s character as well as his or her vision. This leads up to defining a 90-day action plan on a focused goal related to the vision and purpose in order to create the excitement and passion needed to drive change and stay focused during turbulent times.

With Self Managing Leadership®, you will develop a clear sense of direction, clarify your options and improve your ability to make tough choices.

» Learn how to lead through influence, not authority
» Learn how to transform bad habits and patterns into good ones
» Learn how to make better choices by being a ‘detached observer’
» Develop and strengthen your intuitive, emotional and social intelligence
» Identify and leverage your core strengths and qualities
» Focus on the few things that will have the greatest impacts on your life
» Create breakthrough goals and an action plan to execute them

SML takes an ‘inside-out’ approach to leadership, helping participants define their focus and vision for the next chapter in professional and personal life.
