
EXECUTIVE PROFILE

Andre Bischoff

CFO

andre.bischoff@oxfordleadership.com

“Oxford Leadership is the leading provider of executive development in Telefónica’s Corporate University. More than 2,000 Telefónica Executives and Directors have completed the Oxford Leadership courses. The LHPT receives a consistently high level of evaluation.”

Rory Simpson

Chief Learning Officer
Telefónica, UK

“SML is a remarkable process for giving people greater self awareness and the willingness to embark upon a journey of genuine change. We’ve benefited from it corporately and I believe the SML programme is uniquely applicable to any business, government or social institution that is serious about transforming their organisation through the development of its leaders at all levels.”

John Williams

General Manager
Pacific Power, Australia

Andre is the Chief Financial Officer of Oxford Leadership. He is based in the UK.

Andre has been working with Oxford Leadership since 2009, initially in a Non-Executive Role advising on new Commercial, Quality Control and Corporate Governance Procedures to support the global growth of the organisation.

Andre qualified as a Chartered Accountant with Ernst & Young in 1988. He worked in their Business Services Division advising businesses on all aspects of finance and strategy and taking companies through the complete business cycle from start up through to exit.

In 1995 he was headhunted to join a private client division of Union Bank of Switzerland and head up an initiative to develop a full service business advisory group to their “very high net worth” client base. In 1998 Andre was part of the management group which took the division independent and culminated in the launch of the Chiltern Group of Companies. Over a five year period the Chiltern Group grew from US\$20m of revenues to US\$80m.

Following the sale of the Chiltern Group in 2007 Andre performed a range of consulting assignments as well as providing interim management and strategic advice to a number of companies.

Andre works in English.
